93	N	N	Wizards of Winter	91	N	N	Yellow Snow	92	N	N	N	N

Definitions:

- Song Name - The song title
- Request Number - The number required to request the song using the request line. When you call the request line, you can press your desired song number immediately instead of listening to the entire phone menu.
- Laser Animation - Some songs feature a 5'x5' animated laser graphic show to go along with the lights.
- Start Date - Projected date when this song will be available and included as part of the show. These are projected dates and the actual dates may vary. Songs are added to the lineup immediately when they are ready.
- Approximate Length - The approximate length in minutes. This is useful if you need to know how long before the current song ends.
- Frequency - This shows how often a song plays in a complete show cycle. This gives you an idea what songs you are more and less likely to see when you stop by the display. Keep in mind you can request any song on demand while at the display.
