

Request Line

Contributed by Michael Farney
Saturday, 14 November 2009

One of the new features this year is the addition of a song request hotline. Patrons viewing the display can call the request number from their cell phone and choose the next song! It's automated and easy. Just call in and follow the voice prompts to pick the song you want to hear. Don't remember what songs we have this year? Just call in and listen to the song listing. So don't be shy and sit there waiting for your favorite song to come on. Just call in, sit back, relax, and enjoy as your favorites are played on the display.

To get the phone number, just watch the LED sign or listen for the number in the announcements. If the LED sign says "Call Line Busy," then another caller is currently making a request or the system is busy and not ready to accept phone calls. Wait a few minutes, and the system usually frees up.

Looking to know your song numbers now so you don't have to listen to a phone menu? Check out the [Song Quick Reference Chart](#) or [Christmas 2009 Playlist](#).

Clicking [NEXT](#) or [PREV](#) will take you to other news articles for Christmas 2009.
